

**SAEKAI**

## Technical Data

A detailed view of a joystick controller. It features a black, multi-tiered joystick handle mounted on a square base. The base is light blue and has four circular buttons, each with a red center, arranged in a cross pattern. There are also several white ports or connectors visible on the sides of the base.

## Installation variant

### Single axis 03

| Type | No. of contacts | Dim.B |
|------|-----------------|-------|
| 01   | 2               | 51    |
| 02   | 4               | 64    |
| 03   | 6               | 76    |

## Double axis 0330

|                                                                                     |                                                                                     |                                                                                     |                                                                                     |                                                                                     |                                                                                     |                                                                                      |                                                                                       |                                                                                       |                                                                                       |
